## OUR TRAINING AND EDUCATIONAL ACTIVITIES

From the day that The Türkiye Diyanet Foundation was found, it aims to train specialists that understand our deep-rooted heritage of civilization, worries about the ummah and has high self-esteem.

Our Foundation, which provides scholarships to successful students, opens higher education student dormitories, student guest houses, colleges, and universities and establishes bridges of hearts between nations by offering students from 114 countries the opportunity to study in Türkiye with projects such as International Anatolian Imam Hatip High School, International Theology Undergraduate, and Graduate Programs.

Our Foundation meets the deficit in the area of education by providing opportunities for more than 50 years of experience and extensive knowledge.

## Education Is Our Priority

As part of its international outreach programs, the Foundation supports educational initiatives in 12 countries: Azerbaijan, Kyrgyzstan, Bangladesh, Romania, Bulgaria, Kosovo, Pakistan, Palestine, Afghanistan, Tanzania, Syria, and Somalia, providing educational and scholarship opportunities to approximately 12,300 students across 34 institutions. Since the establishment of these programs, a total of 19,639 students have successfully graduated.

Within the broader framework of the Foundation's educational activities, the Diyanet Scholarship Programs constitute a key strategic pillar. Currently, 3,386 international students from 114 countries are pursuing their studies in Türkiye, enrolled in Imam Hatip High Schools as well as undergraduate, master's, and doctoral programs in the Faculties of Theology.

In accordance with establishment purpose of our Foundation, we have been supporting and contributing religious education activities in the Muslim societies whole around the world.

## THE PURPOSE OF THE PROGRAM

The Purpose of TDV International Theology Undergraduate Program;

- a) To contribute to the need for religious education for Muslim communities abroad.
- b) Enlighten their country and its surroundings, and provide education for students with a clear understanding of Islamic religion and Islamic civilization.
- c) To build cultural bridges between Türkiye and related societies.
- d) To share experience in the field of Islamic education.

## EDUCATION IN THEOLOGY FACULTIES

Faculties of Islamic Theology consist of three main departments. All students take their courses from these three departments at the undergraduate level.

**Islamic Studies:** Making up the backbone of the faculties of Islamic theology, this department teaches the sciences that flourished in fields like law and ethics, which arose from the key sources of Islam by contemplating on the knowledge in these sources. In this department there are Islamic Theology (kalam), Quranic Exegesis (tafsir), Hadith, Islamic Law, Sufism (Tasawwuf), History of Islamic Sects, Arabic Language and Eloquence, Reading the Quran and the Science of Recitation.

**Philosophy and Religious Studies:** One of the aspects that makes theological education in Türkiye more advantageous compared to other Islamic countries is that philosophy and religious sciences are taught in an integrated manner with the courses of Islamic theology. The fundamental disciplines included in Philosophy and religious sciences are the following: Religious Education, Philosophy of Religion, Psychology of Religion, Sociology of Religion, History of Religions, History of Philosophy, Islamic Philosophy and Logic.

**Islamic History and Arts:** This department is part of the Faculty of Islamic Theology in order to supplement the education of theology in terms of history, art, and literature, and its main courses are Islamic History, History of Turkish-Islamic Arts, Turkish-Islamic Literature, and Turkish Religious Music.

Given the richness and diversity of the departments, a student who will receive education of Theology in Türkiye will be studying in a university, rather than a faculty, as he/she will be acquiring considerable knowledge on philosophy, literature, history, sociology, psychology, and art history in addition to taking the basic courses of Islamic sciences.
